ANSI/SPRI RP-4 Wind Design Standard now available

Waltham, MA, December 2008 – SPRI, the association representing sheet membrane and component suppliers to the commercial roofing industry, has announced that “Wind Design Standard For Ballasted Single-ply Roofing Systems ANSI/SPRI RP-4” has been accepted as an American National Standard as of December 2008.

This standard which was approved in 1997, revised and re-approved in 2002, and again in 2008, is intended as reference for those individuals who design, specify, and install ballasted single-ply roofing systems. As required by the American Standards Institute policy, all National Standards must be re-evaluated every five years.

All SPRI standards can be downloaded **free of charge** at www.spri.org.
