#### **SPRI Announces Plans to Revise ANSI/SPRI RP-4-2003**

Waltham, MA, February 2007 – SPRI, the association representing sheet membrane and component suppliers to the commercial roofing industry announced its plans to revise ANSI/SPRI RP-4-2003 Wind Design Standard for Ballasted Single-ply Roofing Systems.

This standard which was approved in 1997, revised and re-approved in 2002, is intended as reference for those individuals who design, specify, and install ballasted single-ply roofing systems. As required by the American National Standards Institute policy, all National Standards must be re-evaluated every five years. SPRI intends to re-canvass this standard beginning in April 2007. Any interested party may participate in the canvass by contacting SPRI.
