**SPRI Announces Canvass of ANSI Wind Design Standard Practice for Roofing Assemblies for Approval as ANSI Standard**

Waltham, MA, July 2006 – SPRI, the association representing sheet membrane and component suppliers to the commercial roofing industry announced its plans to canvass the Wind Design Standard Practice for Roofing Assemblies for approval as an American National Standard.

This Wind Design Standard Practice developed with support from several industry partners provides a two-part methodology of designing for wind uplift resistance of non-ballasted Built-Up, Modified Bitumen, and Single-Ply roofing system assemblies installed over any type of roof deck. (Refer to the ANSI/SPRI RP-4 Standard for wind design requirements of ballasted single-ply roofing systems).

Any interested party may participate in the canvass by contacting [info@SPRI.org](mailto:info@SPRI.org).
