SPRI Welcomes Three New Members

Waltham, MA, February 2010— SPRI, the association representing sheet membrane and component suppliers to the commercial roofing industry, recently welcomed three new members to the association:

Pactiv Building Products, Lake Forest, IL
Polyglass USA Inc., Fernley, NV
National ES Testing Service Inc., Atlanta, GA

The new additions bring SPRI's membership to 64 manufacturers and raw materials and components suppliers, as well as consultants, architectural firms, distributors and other companies active in the single-ply roofing market.

New member Pactiv Corporation manufactures and distributes GreenGuard building products throughout the U.S. GreenGuard features a comprehensive system of products designed to protect against moisture infiltration and increase energy efficiency, helping customers achieve best industry practices. Commercial roofing products include drainage mats, building wraps, insulation and recover boards, and self-adhered butyl flashing.

Polyglass has a significant presence in the roofing industry in the European and American markets. Since entering the marketplace with modified bituminous membranes in the 1960s, Polyglass has diversified. In 1991, Polyglass introduced its wide range of products to the U.S. market by opening a new manufacturing facility in Fernley, NV. New plants were also built in Hazleton, PA and Winter Haven, FL. These facilities produce high quality roofing membranes and underlayments that feature state-of-the-art self-adhesive technologies.

National ES Testing Service Inc. offers ANSI/SPRI ES-1 compliant testing services and is a recognized leader in sheet metal perimeter edge testing services. The company has been involved in a wide variety of commercial building projects, testing roof edges to assure that not only meet the new local codes but also comply with the requirements of the 2003 International Building Code (IBC). NESTS Inc. will test copings, fascias and gravel stops to ensure complete building code compliance.

For more information about SPRI, its members, and its activities, visit SPRI's Web site at www.spri.org or contact the association at info@spri.org.
